Spare parts warehouse at a new address

As of September, we will be dispatching spare parts from our new warehouse in Kostelec nad Orlicí. The new warehouse is more spacious and modern. You can now find a large number of spare parts for your BEDNAR machines in one place.

Why the new spare parts warehouse?

In order to increase the storage capacity, we have decided to move the spare parts warehouse from the BEDNAR FMT site in Rychnov nad Kněžnou to new premises owned by the company TTV transport in Kostelec nad Orlicí. The new warehouse is not only more spacious and modern, but also better arranged and this allows us to dispatch all the spare parts to you faster.

What complications were there?

In order to move the warehouse to the new premises, the warehouse was closed on 31 August and no orders were dispatched that day. All orders from that day were dealt with immediately the following working day. We apologize for any inconvenience.

**Would you like to pre-order a demonstration of the new machines at your farm, or ask about any details?
Do not hesitate to contact us. Together, we will come up with a solution.**
